Dear WRSA officers and members,

Six months have passed since our eighth Newsletter. As you well know, the worldwide irruption of the COVID-19 has marked all our activity in all aspects over these months, and the world of rabbit science has been no exception. In any case, we have tried to summarize the main news of these last six months in the current issue.

## Letter from the WRSA President

Dear WRSA members and followers,

At the dawn of this new year, everyone is concerned by the COVID pandemic, and everyone also hope to success in this world fight. However, the world challenge for food security is still present, and we are sure that rabbit farming will contribute to this challenge. In 2020, our community is enlarging with two new branches, from Malaysia and Philippines, that obtain their preliminary registration to our federation. Full registration requires a general meeting, that was postpone as well as our world congress to June 2021. Further branches enter the agreement process: Denmark, Uzbekistan, Russia. We hope that their full registration will also be pronounced during our next general meeting. All national branches are the heart of our federation, and I express my gratitude to WRSA National branches officers for sharing the common effort of increasing the knowledge about rabbit science and the interest in rabbit production.

This year, with the WRSA office, we still have a great job in re-preparing our next World Rabbit Congress (23-25 June, Nantes, France). Already, many tasks have been engaged, and the work is intensifying. We hope your participation and in attending the congress (see below the last information about the 12thWRC).

Do not forget to use our discussion forum for every question to our community:

Visit our WRSA website (<http://world-rabbit-science.com/>) and our Facebook page (<https://www.facebook.com/wrsaface/>).

Have a healthy, peaceful and active year.

Thierry GIDENNE 🐰🌍

WRSA President

Auzeville (France), January 28, 2021

## Last News of the World Rabbit Congress

Because of COVID pandemic, our 12th World Rabbit Congress is postponed to 23-25 June 2021, Nantes, France). The organising committee has studied several options to organise the congress, to take into account the "impacts" of the COVID pandemic. Obviously, we are dependant of national health regulation. However, the organising committee have decided to propose a **congress using a "hybrid" system**, conjugating "face-to-face" participations AND on-line participations. Details about the concrete organisation will be posted soon on the website of the congress (<https://colloque.inrae.fr/wrc2020>) and on the WRSA website, and our social network (WRSA Facebook, WRSA google forum).

At present, 185 short papers submitted in 2020 have been accepted, and will presented and published, provided the speaking author will be registered. Still 23 short papers (of 2020) remained under review or correction by author, while 20 papers were withdrawn by the authors.

The second period of submission is closed from 17<sup>th</sup> January 2021, and 38 "new" papers have been submitted. They are now under reviewing process.

All 8 main speakers, main referees, and chairman of sessions and round table have confirmed their participation for our congress next year. Thus, we are confident about the future success of our 12<sup>th</sup>WRC.

You still have all the information about the communications submission, the organisation, the venue at: <https://colloque.inra.fr/wrc2020/Submission>. All relevant information, such as how to be a sponsor and where it will be held ..., is available on the official website of the congress: <https://colloque.inra.fr/wrc2020>

**We look forward to welcoming you to next June.**

*The scientific and organising committee of the 12<sup>th</sup> WRC*

## News from the WRSA branches

During the World Congress of the WRSA in Toulouse, France, in 1996, the members of the North American branch had the idea of organizing a branch of the WRSA that would include North America, Central and South America, as well as the Caribbean countries. The main aim of this branch would be to join the collective interests of rabbit research in America, through the development of a web page, the organization of a congress every four years and the development of an electronic discussion group, among other actions. This organization would be called "The American Branch of the World Scientific Association for Rabbits (AB-WRSA)" and would meet every four years in accordance with the periodic meetings of the WRSA.

*Some of the members of the American branch of the 2010-2014 and 2014-2018 Executive Committees.*

The AB-WRSA congresses were held every four years in the cities of Montecillo, (Mexico-1998), Havana (Cuba-2002), Maringá (Brazil-2006), Córdoba (Argentina-2010), Toluca (Mexico-2014) and Goiania (Brazil-2018). Many publications generated at these events and other interesting information are available on the American Branch website (<https://abwrsa.org/>).

The AB-WRSA Bbranch also supports other associations and events, such as those recently organized by Venezuela in 2020 (Congress of women interested on rabbit farming). The next AB-WRSA congress for 2022 is also in planning.

The current Executive Committee of the AB-WRSA is made up of President Yazmín Felipe (Mexico), Vice-President Gaby Quagliariello (Argentina), Secretary/Treasurer Luiz Machado (Brazil) and with logistical support of Kassy Gomes da Silva (Brazil). This board has a WhatsApp group and is in constant contact, exchanging substantial information and holding online meetings.

The greatest difficulties encountered in recent years are involved with the different languages of the continent as well as its great extension. For this reason, the coordination process of rabbit farming in the American continent has had a certain degree of difficulty. However, we strongly believe that the most important thing is to improve the dialogue between researchers and breeders in general, as well as with the different associations of each country. For this reason, towards the end of 2020, we have worked to prepare an online survey, in order to bring the needs of producers closer to researchers to establish research priorities and to generate innovation in the field of American rabbit breeding.

*Round table in 2018 with the Executive Committee of the AB-WRSA and breeders from Brazil, talking about the strengths, problems and solutions for rabbit farming in the America.*

*Participants of the VI AB-WRSA Congress, Goiania, Brazil, 2018.*

## International and National Congresses

In the last six months, WRSA has news about two events held on-line due to the COVID-19 pandemic.

### **I International Congress of Women of Latin America and the Caribbean interested on Rabbit Farming (Venezuela)**

The Rabbit Center for Rural Organization FAGRO-UCV of Venezuela in collaboration with AB-WRSA organized the 1st International Congress of Women from Latin America and the Caribbean Interested in Rabbit Farming on October 16-18, 2020. As a consequence of the pandemic, and in order to reach all interested women from all over America, a new online system accessible to everyone was used, such as the WhatsApp application.

Ten WhatsApp groups were created, where the organization was synchronously uploading the presentations of the invited speakers, slide by slide, each one accompanied by a voice message. In this way, the speakers were able to reach more than 1500 people who followed the congress through their WhatsApp application.

CONGRESO INTERNACIONAL DE MUJERES CUNICULAS DE AMERICA LATINA Y EL CARIBE

16 17 18 de OCTUBRE

Con la participación especial de la AB - WRSA y Chefs Asociados de Latinoamérica y el Caribe

Centro Cunicola de Organización Rural FAGRO-UCV

Maracay - Venezuela

Para mayor información: [mujerescuniculas.blogspot.com](http://mujerescuniculas.blogspot.com)

A total of 27 invited speakers from 9 countries participated in the Congress (Argentina, Brazil, Colombia, Cuba, Guatemala, Mexico, Spain, Venezuela and Uruguay). Among the speakers participated researchers, technicians, rabbit producers, associations, trainers, furriers, chefs, publicists... The WRSA was present at the congress through the Secretary General (Juan José Pascual) who presented the current state of rabbit farming in the world and in developing countries, and the Vice President of AB-WRSA (Gaby Quagliariello) who presented an experience of rabbit farming development in Mendoza (Argentina).

The presentations were about successful experiences, organizational systems, the role of women and their empowerment through rabbit farming, technical aspects (genetics, reproduction, pathology, nutrition...) and economic management, gastronomy, sustainable production and marketing.

The WRSA has access to all the contents of the congress, which are available to its users.

## WebiAsescu (Spain)

As you all know, this year we had to suspend our annual appointment at the Symposium of ASESCU (Spain). However, rabbit production continues, as well as all its challenges, and the sector can only cope with these with the help of knowledge. For this, it is essential to know the opinion of the experts on the issues that concern us, and to know how the research has evolved in the last year. That is why ASESCU launched the **WebiAsescu trilogy**. In each WebiAsescu, of 1h and 30min each, two experts in the field presented the current situation of three current challenges:

### 11/11/20 - The marketing of rabbit meat and new consumer trends

*How to improve the marketing of rabbit meat. María Luz de Santos Martín. INTERCUN*

*Analysis of the current situation and future perspectives of the rabbit production and meat industry in Spain. Luis Montero de Vicente. Universitat Politècnica de València.*

### 11/24/20 - Pathology: Coronavirus and control of myxomatosis and viral hemorrhagic disease.

*Coronavirus and rabbit farming. Francisco Parra Fernández. Institute of Biotechnology of Asturias. Oviedo University*

*Myxomatosis and viral hemorrhagic disease: key aspects of its control. Juan Rosell Pujol. Cunivetservice. Tarragona*

### 12/16/20 - Present and future of the sector: legislation, certification and animal welfare.
